

Collaborative Learning Technologies Worksheet

Use this handout and the descriptions/samples of collaborative technologies provided on the [session wiki](#). Use the following matrix to identify which tool(s) can be used to facilitate the active/collaborative learning strategies listed. Place a mark in each appropriate cell. One technology has been completed for you as an example. Work with a partner or in a group of 3 to complete this activity - ask each other questions and use each others' expertise to complete the worksheet.

	Wiki	Blog	Google Docs	Google Forms	Google Sites	Google Presentations	MindMeister	Gliffy	Web conferencing	Wallwisher	Glogster	Posterous	Social networks	Bb Tools (WIMBA and Discussion)
Discussion (synchronous and asynchronous)	x

Collaborative Learning Technologies Worksheet

Use this handout and the descriptions/samples of collaborative technologies provided on the [session wiki](#). Think about your current classes and instructional activities. Identify 1 classroom activity/assignment that is either 1) collaborative but not technology mediated (e.g. the students work in partners or groups to create something but they do not use a particular tool) or 2) that is not collaborative and you would like to modify to become collaborative (e.g. changing an independent project to a group project utilizing a new technology).

Select a technology from those listed to integrate into the activity. Describe the activity, identify the learning outcomes (the instructional goal) and explain how the technology will be used by you and your students (how will the technology add to or facilitate their learning).

Work with a partner or in a small group of 3.

Wiki, Blog, GoogleApps (Docs, Forms, Presentations and Sites), MindMeister, Gliffy, Web conferencing, Wallwisher, Glogster, Posterous, Social networks, Blackboard WIMBA Tools, Blackboard Discussion board

Describe Learning Activity One:

Instructional Outcomes:

Technology selected, how it will be used and the benefit of using that technology:
