

# HOW TO REGISTER YOUR iPad/iPOD ON THE WIRELESS NETWORK

Before you can register your device on the CGCC wireless network, you will need to find the MAC (Media Access Control) address. For your iPad or iPod, you will go to Settings >> General >> About >> Wi-Fi address (this is the MAC address). Write down the alphanumeric WiFi (MAC) address so that you can use it to register your device on the CGCC website. **FOR THE NEXT STEP, YOU MUST BE ON A COMPUTER THAT IS ALREADY CONNECTED TO THE NETWORK. This can be from home, or from a campus computer that has a connection.**

Now that you have the MAC address of your device, go to <http://www.cgcc.maricopa.edu/academic-affairs/comp-lab/Pages/WirelessRegistration.aspx> (or, go to <http://www.cgcc.edu> >> Quick Links pulldown menu >> Wireless Network) to get to the "Wireless Registration" page, and click to login and register your device:

Welcome to the Wireless Network!

Chandler-Gilbert Community College offers free Wireless Internet located within the campus and is available in all classrooms, th

As a current student, you are entitled to one device on the network. To use the network, you must register your device. You will need the MAC physical address of your device. Please be sure to new

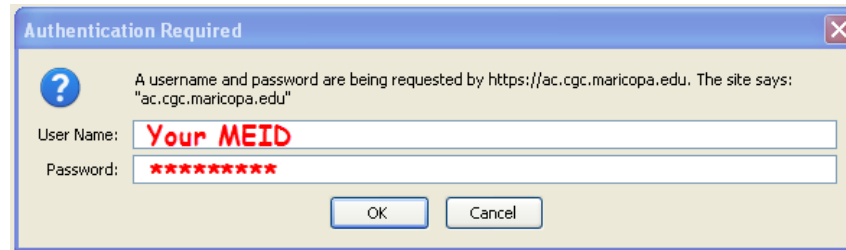

To login and register your MAC address click ["here"](#). For directions on locating your MAC address click ["here"](#) for Microsoft OS (xp, Vista, Windows 7), click ["here"](#) for Mac OS, and click ["here"](#) for other devices.

After registering your MAC address, you will need to add the wireless network to your computer. The name of the student network is **cgccpublic**. The network is always broadcasting, and it should automatically appear as a choice when you come on campus. You will only have to add the network once. After it has been added, as long as you are a current student it will operate automatically.

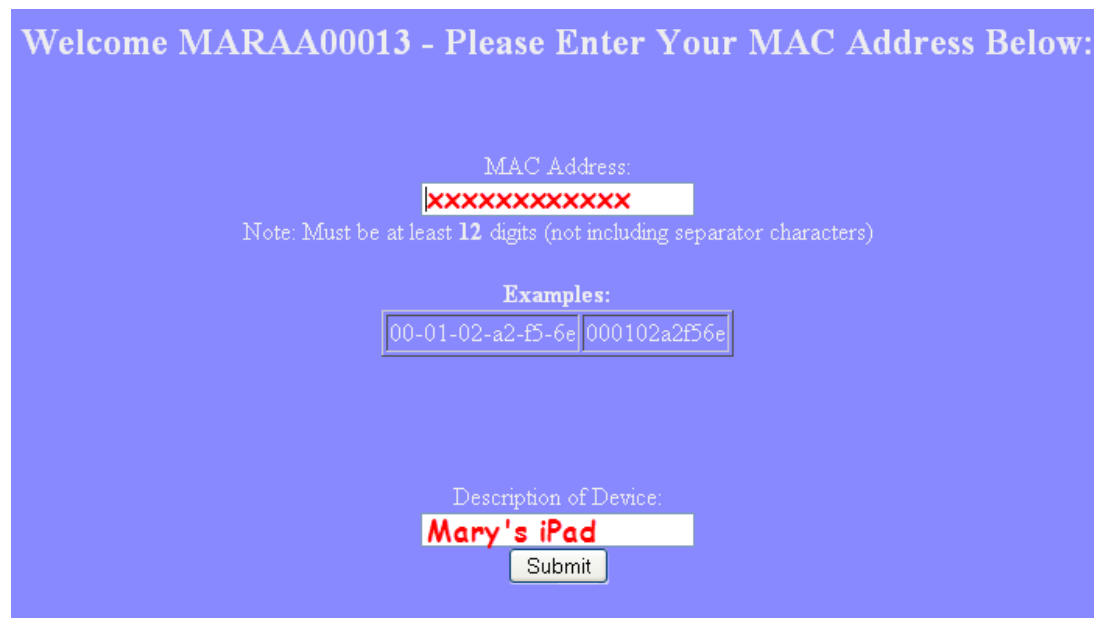

**"To login and register your MAC address click ["here"](#)."**

You will be asked for authentication in order to access the network; just use your MEID username and password, as you do for everything else, then click "OK":

Now just enter the MAC address of your device, give it a brief description (for example, I have a laptop, and iPad, and an iPod registered, so it's good to have a unique identifier for each):

Once you hit "Submit," you should get a confirmation message. That's it – you are now ready to use the CGCC wireless network with your mobile device!
