

CREATE A POLL USING POLLEVERYWHERE

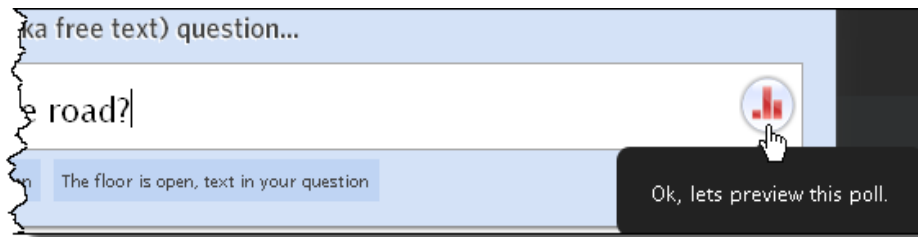

1. Log in to <http://polleverywhere.com>. In the upper right-hand corner, click "Create New Poll."

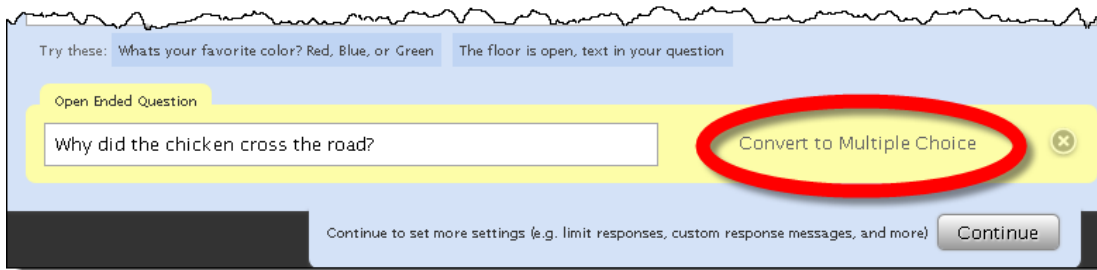

2. Type in your question ...

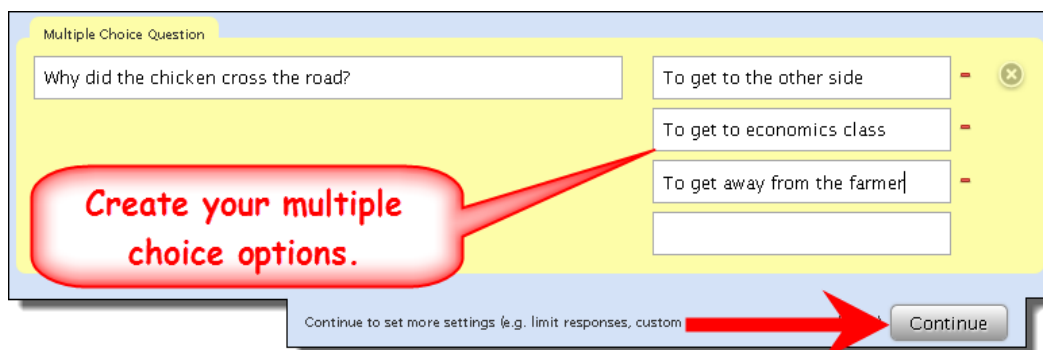

- ... then click the Polleverywhere logo to the right of the question:

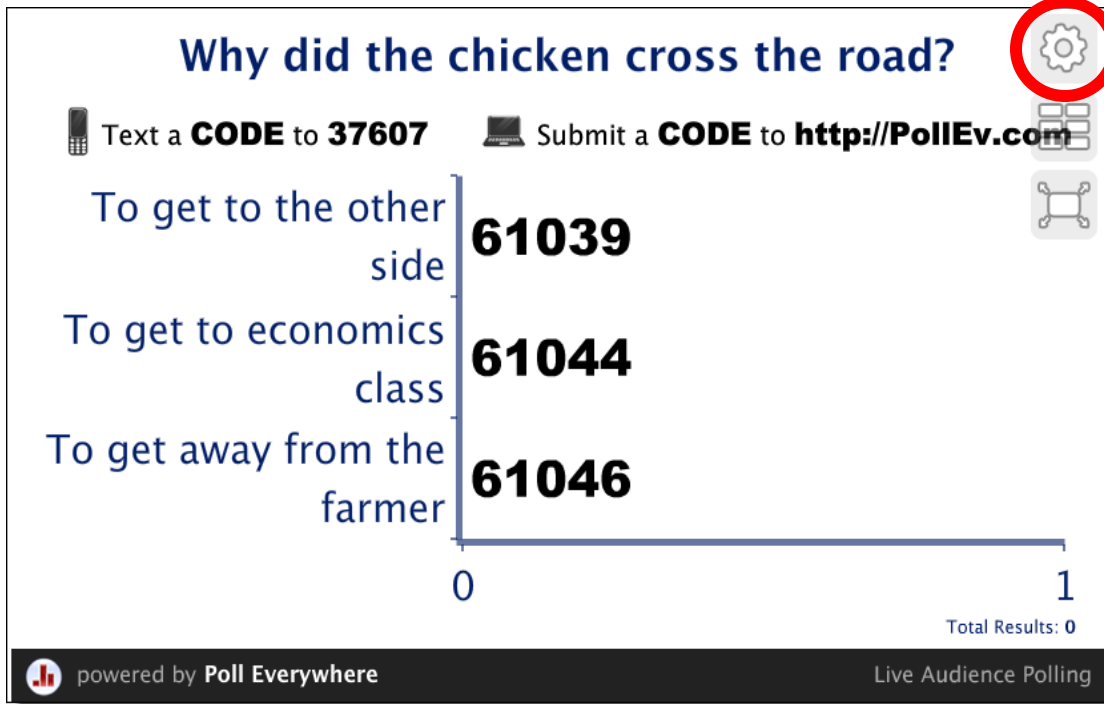

3. Now you need to decide whether you want to keep it as an open-text response (the default), or whether you want to change it to a multiple choice question. For this example, I'll click the "Convert to Multiple Choice" link:

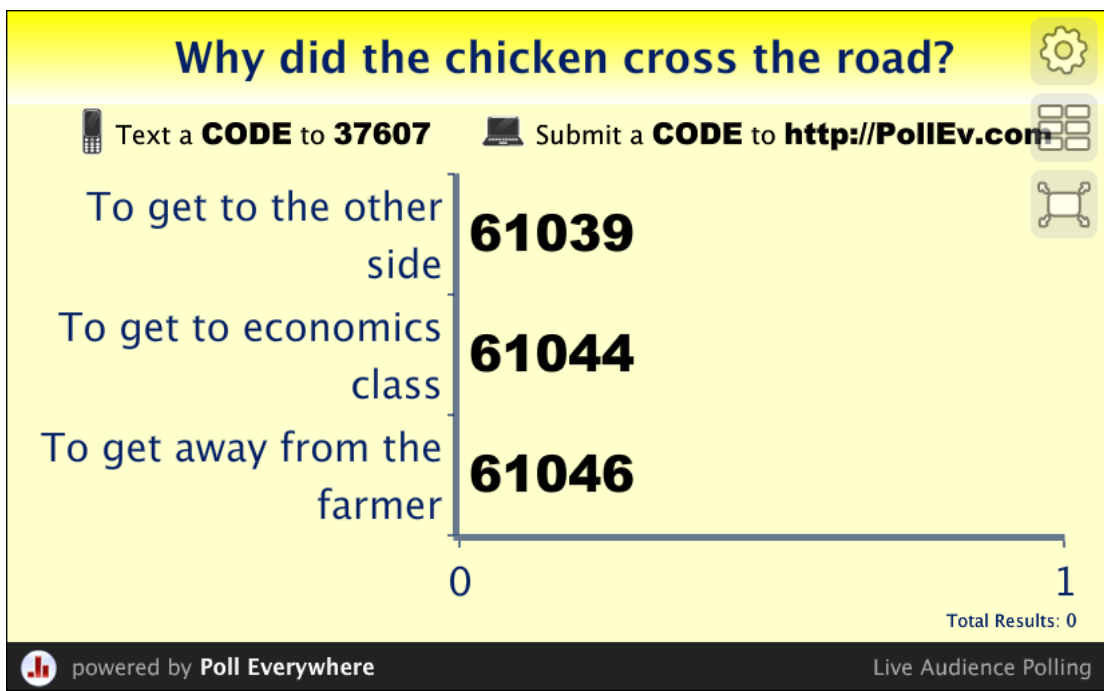

As the default, Polleverywhere will open three blank choice selections for you to fill in; if you need more than three, just hit return after the third choice to add a fourth selection. When you have your multiple choice options completed, click "Continue":

4. That's it – your poll is ready to launch. If, however, you want to polish up the look of the poll, you can click the settings icon that is located in the upper right corner of the poll.

Using the Settings, I was able to adjust the sizes of the various text components, and the background colors of the poll:

My poll is now ready to go!!
