

CREATE A POLL USING POLLEVERYWHERE

1. Log in to <http://polleverywhere.com>. In the upper left-hand corner, click the “Create Poll” button. A box will pop up for you to enter your poll question:

Poll Question: ProTip™

Create Poll

Cancel Create →

2. Type in your question – notice that the default is that the question will be open ended, i.e., the audience can text in any response that they want. What if I want my question to be multiple choice, instead? To change it, just click the Multiple Choice radio button.

Poll Question:

Why did the chicken cross the road?

How will my audience respond?

☐ Open Ended Your audience can respond with anything.

☒ Multiple Choice You can set more advanced options later.

The default for Multiple Choice is to have two options, but it's easy to add more by using the “add an answer” button. A recent feature of PollEverywhere is the ability to use images as voting options, rather than only verbal options (I won't be using that feature for this example, but go ahead and try it for yourself!).

Poll Question:

Why did the chicken cross the road?

How will my audience respond?

☐ Open Ended Your audience can select from these answers:

☒ Multiple Choice

To get to the other side

To get to economics class

To get away from the farmer

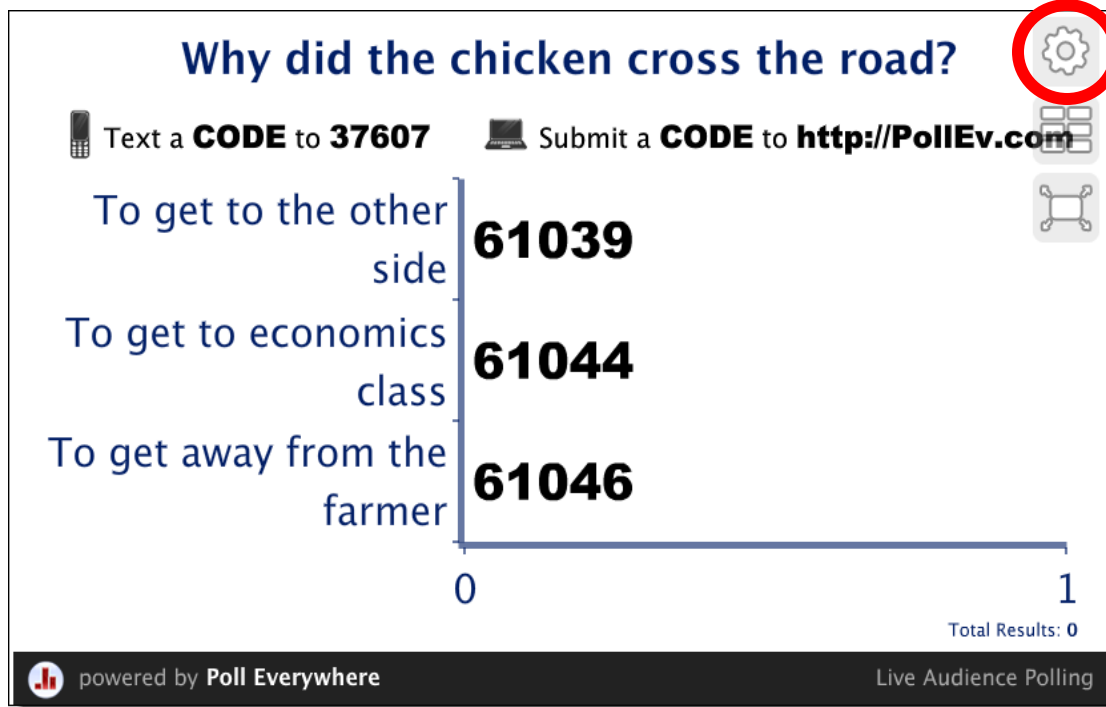

Add an answer

Click here to use an image as a voting option instead of text!

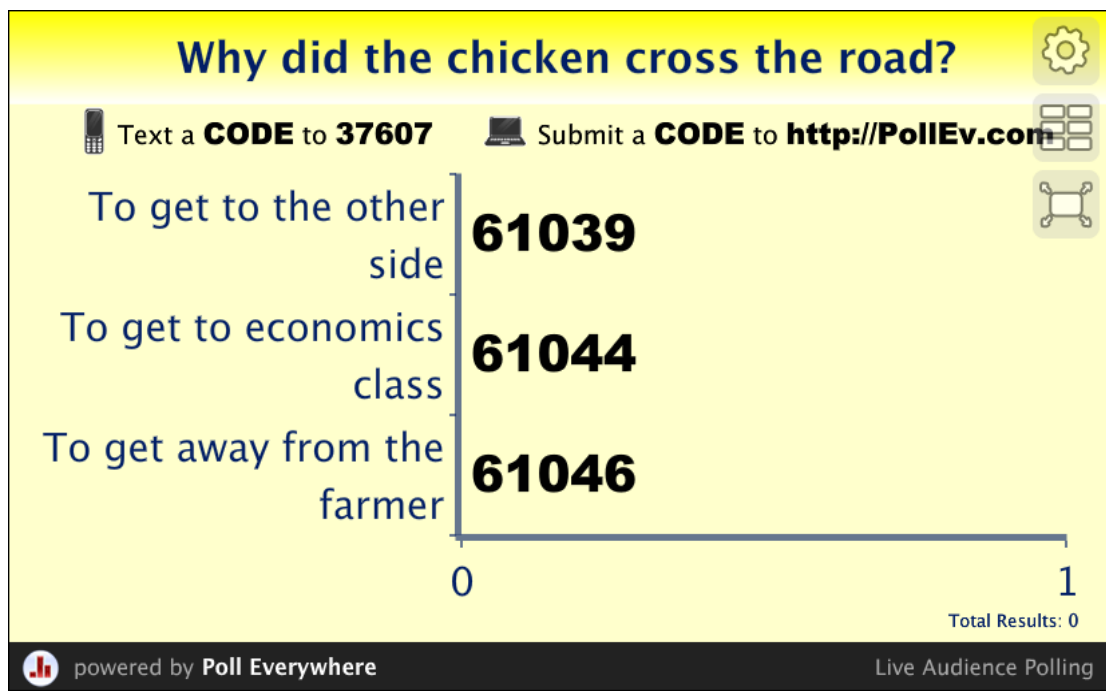

I clicked "Add an answer" to get a third option.

When your poll is ready, click the blue **Create →** button.

3. That's it – your poll is ready to launch. If, however, you want to polish up the look of the poll, you can click the settings icon that is located in the upper right corner of the poll.

Using the Settings, I was able to adjust the sizes of the various text components, and the background colors of the poll:

My poll is now ready to go!!
