

Assignment: Country Resources

One of your jobs this semester is to become a "country expert" for your selected research country. To get started, you will report out on a key current event for your research country, then take what you learned in class about resources and directly apply it to your country of expertise.

Task : Find out about your research country's resources; you will share that information with other students in the class who have a country related to yours.

- Go to the [CIA Factbook \(https://www.cia.gov/library/publications/the-world-factbook/\)](https://www.cia.gov/library/publications/the-world-factbook/) for data regarding your country's resources (land, labor, capital, and entrepreneurial ability).
- Consider what the data means (for example, which category of resources represents your country's greatest strength/asset? Which represents your country's greatest weakness?).
- Complete the following table:

RESOURCE CATEGORY:	NOTES (Factbook data, information may have found from other sites)	"What does it mean??" (What are the implications of the data that you have found?)
Land:		
Labor:		
Capital:		
Entrepreneurial Ability:
